About
Limerick Lane Cellars
&
Collins Vineyard

Located along the eastern extremity of the Russian River AVA, and close to the eastern end of the Dry Creek Valley AVA, this is an area of rolling hills with southwestern exposure. The soils are of volcanic origin, mainly a clay loam with a great deal of volcanic rock and shale. The vineyard is dry farmed (no irrigation), relying on winter and spring rains to water the vines and the vineyard is pesticide and fungicide free. The Collins Vineyard planting dates back to 1910.

...blueberry &
blackcurrant aromas

WINEMAKER'S COMMENTS: Dark purple in color with aromas of ripe blackcurrant, blueberry, licorice, allspice and bittersweet chocolate with warm vanilla and toasty oak tones. The powerful black fruit flavors (blueberry, black cherry and blackcurrant) of this opulent wine meld seamlessly with understated tannins and balanced acidity. This compelling wine ends with an intense lingering finish of exotic spice, a hint of leather and succulent black fruit.
